## RESEARCH INTEREST

---

My current research interests are in dependence modeling, extreme-value theory, and spatio-temporal statistics with applications to risk management in finance, insurance, and environmental science.

## EMPLOYMENT

---

Assistant Professor,  
Department of Statistics, University of Manitoba, Winnipeg, Canada

07/2025 –

## EDUCATION

---

**Ph.D. in Statistics**, University of British Columbia

09/2020 – 05/2025

- GPA: 4.0/4.0 (94.9%)
- Thesis: Multivariate extreme value inference based on tail expansions of copulas with applications to systemic risk analysis
- Supervisor: Prof. Harry Joe
- Graduated with the Marshall Prize (Statistics research award) and the Lorraine Schwartz Prize (Mathematics research award).

**M.Sc. in Mathematics and Statistics**, McGill University

09/2018 – 08/2020

- GPA: 4.0/4.0
- Thesis: A self-exciting marked point process model for drought analysis
- Supervisor: Prof. Christian Genest, Prof. Jonathan Jalbert.

**Joint Honours B.A. in Economics and Finance**, McGill University

09/2014 – 05/2018

- GPA: 3.99/4.0
- Graduated with First-Class Joint Honours and Allen Oliver Gold Medal (Top 1).

## PUBLICATIONS

---

1. **Xiaoting Li**, Harry Joe, and Christian Genest. A factor-copula latent-vine time series model for extreme flood insurance losses. *Journal of the American Statistical Association*, 2025. To appear
2. **Xiaoting Li** and Harry Joe. Properties of CoVaR based on tail expansions of copulas. *Journal of Multivariate Analysis*, page 105510, 2025
3. Harry Joe and **Xiaoting Li**. Likelihood inference for factor copula models with asymmetric tail dependence. *Entropy (Special issue Bayesianism)*, 26(7):610, 2024

4. **Xiaoting Li** and Harry Joe. Multivariate directional tail-weighted dependence measures. *Journal of Multivariate Analysis*, 203:105319, 2024
5. **Xiaoting Li** and Harry Joe. Estimation of multivariate tail quantities. *Computational Statistics & Data Analysis*, 185:107761, 2023
6. **Xiaoting Li**, Christian Genest, and Jonathan Jalbert. A self-exciting marked point process model for drought analysis. *Environmetrics*, 32(8):e2697, 2021

## SCHOLARSHIPS AND AWARDS

---

<b>Lorraine Schwartz Prize in Statistics and Probability</b>   UBC	2025
<b>Marshall Prize for Excellence in Statistics</b>   UBC	2025
<b>Postgraduate Scholarship - Doctoral</b>   NSERC of Canada	2022 - 2025
<b>Four Year Fellowships (4YF) for PhD</b>   UBC	2022 - 2025
<b>President's Academic Excellence Initiative PhD Award</b>   UBC	2020 - 2025
<b>Graduate Student Travel Award</b>   UBC	2024
<b>WSDS (Women in Statistics and Data Science) Travel Award</b>   ASA	2023
<b>Faculty of Science Graduate Award</b>   UBC	2020
<b>Graduate Excellence Award</b>   McGill	2019
<b>Graduate Excellence Entrance Award</b>   McGill	2018
<b>Allen Oliver Fellowship</b>   McGill	2018
<b>Curtis J. Eberwein Memorial Prize in Economics</b>   McGill	2017
<b>Tomlinson Engagement Award for Mentoring</b>   McGill	2015

## TEACHING EXPERIENCE

---

<b>Sessional Instructor</b>   University of British Columbia	05/2024 – 06/2024
– STAT 302: Introduction to Probability	
– Teaching Evaluation: 4.66/5.0; Favorable Rating(PF): 90%.	
<b>Head Teaching Assistant</b>   University of British Columbia	
– STAT 302: Introduction to Probability	01/2024 - 04/2024
– STAT 300: Intermediate Statistics for Applications	09/2020 - 12/2020
<b>Teaching Assistant</b>   University of British Columbia	
– STAT 443: Time Series Forecasting	01/2022 - 04/2022
– STAT 406: Statistical Learning	09/2021 - 12/2021
<b>Teaching Assistant</b>   McGill University	
– Math 141: Calculus 2	01/2019 - 12/2019
– Math 222: Calculus 3	09/2015 - 12/2015

## CONFERENCE TALKS

---

<b>MATRIX Research Program on Dependence Modelling</b>   Melbourne, Australia Title: A Bayesian Factor-Vine copula model for extreme flood insurance losses.	08/2024
<b>Workshop on Dependence Models</b>   Munich, Germany Title: Directional tail-weighted dependence measures for multivariate copulas	07/2024
<b>ICSA-Canada Chapter Symposium</b>   Niagara Falls, Canada Title: A Bayesian Factor-Vine copula model for extreme flood insurance losses.	07/2024
<b>UBC-SFU Joint Seminar</b>   Vancouver, Canada Title: A Bayesian Factor-Vine copula model for extreme flood insurance losses.	11/2023
<b>Canadian Statistical Sciences Institute (CANSSI) Showcase</b>   Virtual Title: Estimation of CoVaR based on tail expansions of copulas.	11/2023
<b>Statistical Society of Canada (SSC) 2022</b>   Virtual Title: Nonparametric estimation of multivariate tail quantities.	06/2021

## PROFESSIONAL ACTIVITIES AND SERVICES

---

Peer Reviewer for Statistical Journals	2023 – Present
– Journal of Multivariate Analysis, Annals of the Institute of Statistical Mathematics, Canadian Journal of Statistics, Fuzzy Sets and Systems.	
Adjudicator, Multidisciplinary Undergraduate Research Conference, UBC	2024
Student Representative, Admissions Committee for M.Sc. Statistics Program, UBC	2024
Research Student, Enterprise Stress Testing Division, Scotiabank	2022
Statistical Consultant, Statistical Consulting Practicum, UBC	2021
